Description

Hosting & Server Space

- 20GB SSD storage for fast, reliable data access and site performance.
- 1TB Content Delivery Network (CDN) with integrated Cloudflare management for global reach, speed optimisation, and DDoS protection.
- Enterprise-level firewall and SSL encryption to ensure robust security and data protection.
- Automated backups with uptime monitoring and retention of up to 7 days for rapid recovery and business continuity.

Staging Environment

A full duplicate of the live website will be provisioned as a dedicated staging environment. This environment will be used for testing updates, implementing new features, and making design or content changes before they are deployed to the live site. The staging setup ensures uninterrupted uptime for the live website, reduces risk during updates, and provides a stable, controlled space for experimentation, QA testing, and approvals.

Updates (Back & front-end)

Includes up to 1 hour per month of front-end and back-end updates (content changes, minor design adjustments, and technical updates). Any additional time required will be billed at ZAR950.00/hour.

SEO & Reporting

A full SEO integration will be implemented, with each web page analysed and optimised for performance, visibility, and keyword relevance. The setup includes configuration of Google Analytics and Google Search Console. A detailed monthly report will be provided, covering website traffic, search performance, and key user behaviour insights.

Analytics & Reporting

We will implement a comprehensive analytics setup using Google Tag Manager, Google Analytics, and Google Search Console to ensure accurate tracking of user behaviour, search performance, and engagement across the site. This will provide the client with actionable insights into how members and visitors interact with the website, along with which content is most effective.

Cost Estimate: R 2,580.00

Discount: - R 600.00

Subtotal: R 1,980.00

VAT: R 297.00

Total (Monthly): R 2,277.00
